Chair Soil Mechanics

Dear Prof. Bonev,

Following the tradition of previous years, the Bauhaus-Universität Weimar will be hosting an **International Summer Course** for Structural Engineers organized by the recently established Center for Structural Dynamics and Earthquake Engineering, from 2 to 13 August, 2010.

This year's programme has adapted its focus towards the field of numerical models, and is now titled "**Model Validation and Simulation – Graduate Courses for Structural Engineering Applications**".

A challenging series of lectures, seminars and projects will cover various aspects of working on numerical models and its engineering application (with emphasis on natural hazards and risks).

The aim of the project is to promote cooperation between Civil Engineering students from all over the world and to provide an international forum for the exchange of ideas and experiences, combining research with practice. Additionally, a number of cultural events will be offered.

We would appreciate your recommendations of excellent graduate students for this course program. The application deadline is **31 May 2010**. Applicants will be notified of admission by 9 June 2010.

Upon request, students' achievements can be evaluated by a final exam. The total credit amounts to 4 points according to the European Credit Transfer System (ECTS).

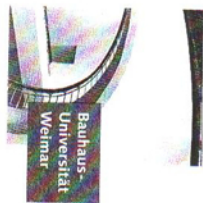

For further information regarding the course content, application, availability of financial support, etc. please refer to <http://www.uni-weimar.de/summerschool>.

Thank you very much in advance for your kind assistance.

Yours sincerely,

Dr.-Ing. Frank Wuttke
